ANTOINE BOLLINGER

WEB DEVELOPER

Translator. Creator. Communicating.
These are the words that best define my work. **Translating texts**, **elaborating catalogs**, **writing codes** for website, all this implies **translation** – **of a need, a request or even a desire** – and the **creation of a result**. And all this contributes to **communication between people**. That is **where is my activity** and **what drives me**.
